an exam to establish a standard method of measurement for the skills and abilities that have been acquired by the test taker these skills are both a measure of what a test taker has already learned and an indicator of future success

essay from the year 2015 in the subject german studies linguistics grade 1 3 university of freiburg philologische fakultät language english abstract this paper presents findings from an experimental interview study exploring the usage of german hesitation markers by native speakers aged nineteen to thirty one with limited research on this topic the study investigates factors influencing hesitation marker frequency including gender topic type casual vs non casual and speaker familiarity twenty nine participants were interviewed on various prepared questions followed by an online perception study assessing how hesitation markers influence perceived masculinity and potential professions results indicate that males tend to use hesitation markers such as ähm öhm äh and öh more frequently additionally hesitation marker distribution is slightly higher for casual topics and when

interacting with well known friends pauses occur more with male speakers non casual topics and distant speaker interviewer proximity lengthened vowels another hesitation marker are more common among males for casual topics and with distant proximity the perception study supports the notion that the use of hesitation markers is perceived as less masculine ambiguities in the findings underscore the complexity of this linguistic phenomenon this paper offers valuable insights into german hesitation markers shedding light on their nuanced usage and the influence of gender topic and speaker familiarity readers intrigued by language and sociolinguistics will find this study a compelling exploration of communication patterns among german native speakers
